## Software

---

I am a proficient R user, with a particular interest in the `r-spatial` world and the tidyverse environment. I am the author of two R packages, namely `osmextract` ([reviewed](#) by rOpenSci foundation and now on [CRAN](#)) and `sfnetworks` (also on [CRAN](#)). The first package focuses on the management and downloading of Open Street Map data extracts obtained from several providers (like [Geofabrik](#)), while the second package provides a tidy approach to spatial network analysis.

I contributed to several R packages like `ggplot2`, `recipes`, `sf`, `stplanr` and `osmdata`. I attended the [Tidyverse Developer Day](#) in Tolouse during the UseR! 2019 conference and I plan to attend the [R Project Sprint 2023](#) event at the University of Warwick (UK).

I can write scientific documents and presentations using  $\LaTeX$  and I have a basic knowledge of SQLite, GDAL, POSTGIS, SAS, Python, and STATA.
